## Energy Efficiency Credits

### ☀️ **HEAT PUMP (HYBRID) WATER HEATER** ☀️ **REBATE PROGRAM**

**Fuel Switching from Propane or Natural Gas to Electric HPWH**  
**\$700**

**Purchase of a Hybrid Water Heater Without Fuel Switch**  
**(Standard Electric Resistance to HPWH)**  
**\$550**

Heat pump water heaters (HPWHs) are electric storage tank units with a built-in air source heat pump. The heat pump absorbs heat from the surrounding air and uses a heat exchanger to heat the water in the tank instead of generating heat directly. They can, therefore, be roughly three times more energy efficient than conventional gas electric resistance water heaters.

Applications will be accepted until April 30. To be eligible you must be a member of LPEA.

The HPWH unit purchased must allow for online management via a phone application or web portal. Most models meet this criterion, but please contact us at 970-382-7770 if you are not sure. The creation of a shared set of credentials for the networked management of the unit is a further requirement to participate in this program. This can be registered to the member's email address, but you must create a password to be shared with LPEA allowing the cooperative access to monitor the HPWHs use for at least one year from the date of acceptance into the pilot program.

*Note: On April 30, LPEA will select up to 30 applicants who meet the specified conditions to receive LPEA's rebates. The standard \$350 portion of this rebate will remain available indefinitely.*

LPEA and its power supplier Tri-State Generation and Transmission will pay credits to their consumers for the aforementioned electric heating systems, and energy efficient products and programs. All credit must be requested within 120 days of installation. For detailed information go to: [http://www.lpea.coop/programs\\_services/efficiencycredits.htm](http://www.lpea.coop/programs_services/efficiencycredits.htm). Contact LPEA for more information at 970.247.5786

Member name (as it appears on your bill): \_\_\_\_\_

Account Number: \_\_\_\_\_ Phone Number: \_\_\_\_\_

Service Address (where the unit will be installed): \_\_\_\_\_

*Please attach invoice for the purchase and installation (if a contractor was used) of a hybrid water heater.*

Login Credentials (to be collected after installation)

\_\_\_\_\_

This document confirms the member's acceptance of these terms and that the HPWH will be installed at the service location specified. Additionally, the member acknowledges LPEA's access to their water heaters management portal for the purposes of usage tracking and alerting should it lose connectivity to the network.

### Program Survey Questions

What is your current fuel source for hot water?

- Natural Gas
- Propane
- Electric
- On-Demand Electric
- Other (please specify) \_\_\_\_\_

Do you use a smartphone?  Yes  No

Do you manage any devices using smartphone apps currently?  Yes  No

If not for new construction when was the water heater this unit will replace installed?

\_\_\_\_\_

Do you intend to utilize the heat pump water heaters byproduct of dehumidified airconditioned air for home cooling or other purposes?

\_\_\_\_\_

Where in the home will the hybrid water heater be installed (for example garage, kitchen closet, basement)?

\_\_\_\_\_
